

Quarto-qrcode example

Examples for <https://github.com/jmbuhr/quarto-qrcode>

Usage

HTML

```
{{< qrcode https://jmbuhr.de >}}
```

Supply an ID as the second argument (here `qr1` and `qr2`) if you have more than one qrcode to keep them separate. Use keyword arguments to change the style of the qrcode ([available options](#)).

```
{{< qrcode https://jmbuhr.de qr1 width=100 height=100 colorDark='#0011bb' >}}
```

```
{{< qrcode https://jmbuhr.de qr2 width=100 height=100 colorDark='#0011bb' >}}
```

Style your qrcodes with the `qrcode` css class on the surrounding div.

```
<style>
.qrcode {
  margin-bottom: 1rem;
}
</style>
```

PDF

For options specific to pdf output such as the height of the qrcode in a unit that tex can understand, append `pdf` to the name of the option to be passed to the qrcode CTAN package.

```
{\< qrcode https://jmbuhr.de qr1 width=100 height=100 pdfheight=4cm >}}
```

```
{\< qrcode https://jmbuhr.de qr1 width=100 height=100 pdfdraft >}}
```
